

# Stuffing-Box-Packing Type 2127

## Material composition

Diagonally braided from acrylic fibre, impregnated throughout with PTFE-dispersion, lubricated with silicone oil.

Please note: the colour of the actual product might vary from the image on this data-sheet.

## Properties

Style 2127 is a dense, yet soft and pliable packing . The combination of the synthetic fibres, the PTFE-impregnation and the high-temperature break-in lubricant results in a packing with very low shaft wear and outstanding durability.

## Application areas

Multi-purpose packing which can be used in pumps, mixers, kneaders and valves in the chemical, pharmaceutical, pulp- and paper and food industry.

## Application media

TEADIT style 2127 covers a wide variety of media like water, steam, diluted acids and lyes, most chemicals, gases, etc.

## Not suitable for

Concentrated acids and lyes, oxygen, lacquers and paint.

## Benefits

Excellent all-round packing for many applications within a plant.  
Non contaminating, not shaft scouring. WRC approval.

### Temperature:

	- temp	+ temp
